Congratulations with your new Jubba rug

How to enjoy your
Fraster rug for many years.

Your new carpet in quality Jubba is tufted from polyamide, which gives the carpet a lively and soft surface.

Jubba polyamide yarn is very durable and retains its appearance and softness for years without losing its elasticity.

It is recommended to vacuum the carpet often to keep the carpet free of dust and dirt, which will otherwise settle as permanent stains. Do not use a brush head with rotating brushes.

How often the rug should be vacuumed depends on its use. The more powerful the use, the more often the rug must be vacuumed. As a guideline, it is recommended to vacuum twice a week if two people live in the household and more if the household is larger.

The polyamide fiber has a good recovery ability, but it is still recommended to use protection under chair and table legs, and not to leave the furniture in the same place permanently, to avoid pressure marks in the carpet.

Although the polyamide fiber for the Jubba carpet has good lightfastness, direct sunlight over a longer period can cause the carpet to change color.

Stain removal.

- Remove any spills and stains immediately.
- All carpet cleaning solutions have instructions. please follow these instructions carefully.

Alternatively, a simple method can be used:

- Mix 1 part white vinegar thoroughly with 1 part cold water.
- Spray the vinegar / water mixture on the stain.
- Sprinkle baking soda on the spot and let it set.
- Dab the spot dry with a clean cloth.
- Let it dry and vacuum
